Cars In The Weeds

A column for MPOTAC members to share photos of their roadside “discoveries”

This 1st Generation Seville was recently abandoned on Wisnom Avenue in San Mateo.

Weathered on the outside; the interior is not bad. V.I.N. appears to be: “6S69B99471084”

Send us your own “road treasure” photos for next month!

Automotive “Worst Practices”

This Jeep received some rear wiring “repair”. Could they have put it any closer to the exhaust pipe?

May your 2016 Thanksgiving table be filled with food, drink, laughter and good will.
